

Kalangi Vasantha Lahari

Vijayawada, India

vasanthalahari2006@gmail.com — 9032581282 — LinkedIn — GitHub

Summary

Computer Science undergraduate with strong foundations in **data structures, algorithms, and object-oriented programming**. Hands-on experience in **backend engineering** using Python and FastAPI, API design, testing, and cloud-based applications on **Microsoft Azure**. Passionate about building **scalable, reliable, and maintainable software systems** in collaborative engineering environments.

Education

K L University

B.Tech in Computer Science and Engineering

GPA: **9.21 / 10**

July 2023 – 2027

Edify School, Tirupati (CBSE)

Percentage: 77%

June 2021 – 2023

Technical Skills

Programming Languages: Python, Java, C, JavaScript, SQL

Frameworks & Libraries: FastAPI, React.js, SQLAlchemy

Databases: MySQL

Tools & Platforms: Git, Microsoft Azure, Power BI, Excel

Core CS Concepts: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

Text-to-SQL Generator

- Designed and developed an AI-powered system to convert natural language queries into executable SQL statements.
- Implemented automatic database schema extraction, improving query accuracy and reducing invalid SQL generation.
- Built end-to-end backend services using **FastAPI** and SQLAlchemy with input validation and error handling.
- Focused on system reliability by validating generated queries before execution.

RESTful Expense Tracker Application

- Designed and implemented RESTful APIs for expense management using **FastAPI**.
- Developed CRUD operations with modular architecture and request validation.
- Optimized SQL queries to improve data retrieval efficiency.
- Applied clean coding practices to ensure maintainability and scalability.

Weather Application

- Built a web application providing real-time weather data using external REST APIs.
- Implemented asynchronous data fetching and responsive UI components.
- Ensured reliable API integration and graceful handling of network failures.

Internship Experience

AICTE Virtual Internship – AI on Microsoft Azure

May 2025 – June 2025

- Gained hands-on experience with cloud-based AI services on **Microsoft Azure**.
- Worked on model deployment concepts, data analysis, and cloud resource management.
- Developed understanding of scalable cloud architectures and service reliability.

AI Intern – 4 Sight AI

September 2025 – November 2025

- Tested and validated backend REST APIs built using **FastAPI**, ensuring correctness and performance.
- Performed structured data validation to support AI model pipelines.
- Collaborated with developers to identify bugs, document issues, and improve system stability.
- Contributed to backend verification for real-world **AI4Police** use cases.

Problem Solving

- Solved Data Structures and Algorithms problems on LeetCode and HackerRank.
- Strong understanding of arrays, strings, hash maps, stacks, queues, recursion, and trees.
- Applied time and space complexity analysis to optimize solutions.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Frontend Developer (React) Certification
